Certaines caractéristiques

Data in many forms. . .

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer printouts, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

How to obtain more information

Inquiries about this publication and related statistics or services should be directed to the Statistics Canada reference centre in:

St. John's	772-4073	Winnipeg	949-4020
Halifax	426-5331	Regina	359-5405
Montréal	283-5725	Edmonton	420-3027
Ottawa	992-4734	Vancouver	666-3691
Toronto	966-6586		

Toll-free access is provided in all provinces and territories, for users who reside outside the local dialing area of any of the regional reference centres:

Newfoundland & Labrador	Zenith 07037
Nova Scotia, New Brunswick & Prince Edward Island	1-800-565-7192
Québec	1-800-361-2831
Ontario	1-800-268-1150
Manitoba	1-800-282-8006
Saskatchewan	1 (112)-800-667-3524
Alberta	1-800-222-6400
British Columbia (South & Central)	112-800-663-1551
Yukon & Northern B.C. (area served by NorthwesTel Inc.)	Zenith 08913
Northwest Territories	Zenith 22015

How to order publications

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, Ottawa, Ontario, K1A 0V7.

Des données sous plusieurs formes. . .

Statistique Canada diffuse des données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms, et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée aux centres de référence de Statistique Canada à:

St. John's	772-4073	Winnipeg	949-4020
Halifax	426-5331	Regina	359-5405
Montréal	283-5725	Edmonton	420-3027
Ottawa	992-4734	Vancouver	666-3691
Toronto	966-6586		

Un service d'appel sans frais est offert, dans toutes les provinces et dans les territoires, aux utilisateurs qui habitent à l'extérieur des zones de communication locale des centres de référence régionaux:

Terre-Neuve et Labrador	Zénith 07037	
Nouvelle-Écosse, Nouveau-Brunsw et Île-du-Prince-Édouard	ick 1-800-565-7192	
Québec	1-800-361-2831	
Ontario	1-800-268-1150	
Manitoba	1-800-282-8006	
Saskatchewan	1 (112)-800-667-3524	
Alberta	1-800-222-6400	
Colombie-Britannique (région sud et centrale)	112-800-663-1551	
Yukon et le nord de la Colombie-Britannique (région desservie par NorthwesTel Inc.) Zénith 089		
Territoires du Nord-Ouest	Zénith 22015	

Comment commander les publications

On peut se procurer cette publication et les autres publications de Statistique Canada auprès des agents autorisés et des autres librairies locales, par l'entremise des bureaux régionaux de Statistique Canada, ou en écrivant à Ventes et distribution de publications, Statistique Canada, Ottawa, (Ontario), K1A 0V7.

,

INTRODUCTION

This bulletin provides, for census divisions (CDs) (see definition below), a compendium of the most frequently used data collected by the 1981 Census of Canada on a 100% basis. A second bulletin (Catalogue No. 95-942) presents additional data collected on a 20% sample basis.

For the 1981 Census there are five census divisions in the Northwest Territories. This increase of one census division results from the creation of the Central Arctic Region that, in 1976, was part of the Fort Smith Region.

All land area measurements apply to the limits in effect on January 1, 1981, the geographic reference date for the 1981 Census of Canada. The Census of Canada provides unofficial land area measurements only, as these are required in order to calculate population density. Official land area measurements for Canada and the provinces are available from Energy, Mines and Resources Canada, Surveys and Mapping Branch.

Population counts from the 1976 Census are included for comparison purposes. These 1976 counts have been adjusted to reflect the January 1, 1981 limits upon which the 1981 Census is based. Census division boundaries are subject to change where census subdivision boundaries that are coterminous change. These changes are generally minor in nature.

This bulletin is one of a series of similar presentations for various geographic levels, i.e., federal electoral districts (Catalogue Nos. 95-901 and 95-941), census metropolitan areas (Catalogue Nos. 95-903 and 95-943), census agglomerations (Catalogue Nos. 95-903 and 95-944), census subdivisions of 5,000 population and over (Catalogue Nos. 95-904 and 95-945) and census tracts (Catalogue Nos. 95-905 to 95-940 and 95-946 to 95-981).

A reference map showing all census divisions is included in this bulletin.

DEFINITIONS

Province. Refers to the major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. In census publications, provincial tables include the Yukon and Northwest Territories.

INTRODUCTION

Ce bulletin présente, pour les divisions de recensement (DR) (voir la définition qui figure plus loin), une version abrégée des données les plus fréquemment utilisées qui ont été recueillies auprès de toute la population lors du recensement de 1981. Un second bulletin (nº 95-942 au catalogue) renferme des renseignements additionnels recueillis auprès d'un échantillon de 20 %.

Au recensement de 1981, les Territoires du Nord-Ouest comprenaient cinq divisions de recensement, soit une de plus qu'en 1976. La région de Central Arctic créée en 1981 faisait partie de la région de Fort Smith.

Toutes les superficies s'appliquent aux limites en vigueur au ler janvier 1981, date de référence géographique pour le recensement du Canada de 1981. Ce dernier ne donne que les chiffres officieux, ceux-ci étant nécessaires au calcul de la densité de la population. On peut obtenir les chiffres officiels pour le Canada et les provinces en s'adressant à la Direction des levés et de la cartographie, Énergie, Mines et Ressources Canada.

Les chiffres de population tirés du recensement de 1976 sont joints à des fins comparatives. Ils ont été modifiés afin de tenir compte des limites en vigueur au ler janvier 1981 sur lesquelles se fonde le recensement. Les limites des divisions de recensement peuvent changer lorsqu'il y a modification des limites de subdivisions comcidentes, mais ces changements sont généralement minimes.

Ce bulletin est l'un d'une série de documents similaires sur diverses unités géographiques: circonscriptions électorales fédérales (n^{OS} 95-901 et 95-941 au catalogue); régions métropolitaines de recensement (n^{OS} 95-903 et 95-943 au catalogue); agglomérations de recensement (n^{OS} 95-903 et 95-944 au catalogue); subdivisions de recensement ayant une population de 5,000 habitants et plus (n^{OS} 95-904 et 95-945 au catalogue); et secteurs de recensement (n^{OS} 95-95-940 et 95-946 à 95-981 au catalogue).

Ce bulletin renferme aussi une carte de référence illustrant toutes les divisions de recensement.

DÉFINITIONS

Province. Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Ouest.

DEFINITIONS - Continued

Census Division (CD). Refers to the general term applying to counties, regional districts, regional municipalities and five other types of geographic areas made up of groups of census subdivisions. In Newfoundland, Manitoba, Saskatchewan and Alberta, the term describes areas that have been created by Statistics Canada in cooperation with the provinces as an equivalent for counties.

Land Area. Refers to area measurement in square kilometres and excludes, wherever feasible, large bodies of water.

Population Density. Refers to the number of persons per square kilometre.

Age. Refers to age at last birthday (as of the census reference date, June 3, 1981). This variable is derived from date of birth.

Date of Birth. Refers to the day, month and year of birth, collected for the purpose of determining the person's age as of the census reference date. Persons who were unable to give the exact date of birth were asked to give the best possible estimate.

Sex. Refers to the gender of the respondent.

Marital Status. Refers to the following conjugal status of a person:

Now married (excluding separated) -

Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained. Persons living common-law are considered as "Now married";

Separated -

Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce;

Divorced -

Persons who have obtained a legal divorce and who have not remarried:

Widowed -

Persons who have lost their spouse through death and who have not remarried;

Never married (single) -

Persons who never married (including all persons less than 15 years) and persons whose marriage was annulled.

Mother Tongue. Refers to the first language learned in childhood and still understood by an individual.

DÉFINITIONS - suite

Division de recensement (DR). Terme générique qui désigne les comtés, les districts régionaux, les municipalités régionales et cinq autres types de régions géographiques formées de groupes de subdivisions de recensement. À Terre-Neuve, au Manitoba, en Saskatchewan et en Alberta, l'expression désigne les unités créées comme équivalents des comtés et délimitées par Statistique Canada en collaboration avec les provinces.

Superficie. Surface en kilomètres carrés excluant les grandes nappes d'eau, lorsque cela est possible.

Densité de population. Nombre de personnes au kilomètre carré.

Âge. Âge au dernier anniversaire de naissance (à la date de référence du recensement, le 3 juin 1981). Cette variable est établie d'après la réponse à la question sur la date de naissance.

Date de naissance. Jour, mois et année de naissance aux fins d'établissement de l'âge du recensé au jour du recensement. Les personnes qui ne connaissaient pas la date exacte de leur naissance devaient donner la meilleure estimation possible.

Sexe. Qualité d'homme ou de femme.

État matrimonial. Situation conjugale d'une personne, notamment:

Actuellement marié(e) (sauf séparé(e)):

personne dont le conjoint est vivant, à moins que le couple ne soit séparé ou divorcé; les personnes vivant en union consensuelle sont considérées comme actuellement mariées.

Séparé(e):

personne qui a été abandonnée, ou qui est séparée de son conjoint, légalement ou non, parce qu'elle ne veut plus vivre avec cette personne, mais qui n'a pas obtenu de divorce.

Divorcé(e):

personne qui a obtenu un divorce et qui ne s'est pas remariée.

Veuf(ve):

personne dont le conjoint est décédé et qui ne s'est pas remariée.

Célibataire (jamais marié(e)):

personne qui n'a jamais été mariée (y compris toute personne de moins de 15 ans), ou personne dont le mariage a été annulé.

Langue maternelle. Première langue apprise et encore comprise.

DEFINITIONS - Continued

Although the intent of the question has not changed since 1941 (i.e., the identification of the language first learned as a young child), the wording of the question itself has not been completely uniform. The most recent of these changes is from the 1971/76 wording of "language first spoken and still understood" to the 1981 wording "language first learned and still understood". This change was introduced so the question would conform to the definition of mother tongue given in the Official Languages Act, 1968-69.

Occupied Private Dwelling. Refers to a private dwelling in which a person or group of persons is permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day. Unless otherwise specified, all data in housing reports are for occupied private dwellings rather than unoccupied private dwellings or dwellings occupied solely by foreign and/or temporary residents.

Tenure. Refers to whether some member of the household owns or rents the dwelling.

A dwelling is classified as "owned" even if it is not fully paid for, such as one which has a mortgage or some other claim on it. The dwelling may be situated on rented or leased land or be part of a condominium (whether registered or unregistered).

A dwelling is classified as "rented" even if it is provided without cash rent or at a reduced rent or if the dwelling is part of a co-operative. For census purposes, in a co-operative all members jointly own the co-operative and occupy their dwelling units under a lease agreement.

Structural Type. Refers to the structural arrangements of the dwelling.

Single House (or Single Detached)

Refers to a single dwelling not attached to any other building and surrounded on all sides by open space.

Semi-detached or Double House

Refers to one of two dwellings attached side by side but not attached to any other building and surrounded on all other sides by open space.

<u>Duplex</u>

Refers to one of two dwellings, one above the other, not attached to any other building and surrounded on all sides by open space.

Row House

Refers to one of three or more dwellings joined side by side but not having any other dwellings either above or below.

DÉFINITIONS - suite

Bien que l'objet de cette question n'ait pas changé depuis 1941 (c'est-à-dire connaître la première langue apprise par les recensés), la formulation n'a pas toujours été la même. En 1971 et 1976, on demandait aux recensés d'indiquer la première langue parlée et encore comprise tandis qu'en 1981, on leur demandait d'inscrire la première langue apprise et encore comprise. Cette modification a été apportée afin que la question du recensement corresponde à la définition de langue maternelle dans la Loi sur les langues officielles de 1968-1969.

Logement privé occupé. Logement privé occupé de façon permanente par une personne ou un groupe de personnes. Sont également inclus dans cette catégorie les logements privés dont les résidents habituels sont temporairement absents le jour du recensement. Sauf indication contraire, toutes les données présentées dans les publications sur le logement se rapportent aux logements privés occupés et non à des logements privés inoccupés ou à des logements occupés par des résidents étrangers et (ou) temporaires.

Mode d'occupation. Indique si le logement est possédé ou loué par un membre du ménage.

Un logement est classé "possédé" même s'il est hypothéqué ou grevé d'une autre créance. Le logement peut être situé sur un terrain donné ou pris en location, ou encore faire partie d'un condominium enregistré ou non.

Un logement est classé "loué" même s'il est donné en location sans loyer en argent ou à un loyer réduit, ou qu'il fait partie d'une coopérative. Aux fins du recensement, tous les membres d'une coopérative ont des parts dans cette coopérative et occupent leur logement en vertu d'un bail.

Type de construction. Type de construction du logement.

Maison individuelle (ou logement individuel non attenant)

Logement individuel non attenant à une autre construction et entouré d'espaces libres.

Maison jumelée ou maison double

Deux logements côte à côte réunis par un mur commun, mais non attenants à une autre construction, et entourés d'espaces libres.

Duplex

Deux logements superposés non attenants à une autre construction et entourés d'espaces libres.

Maison en rangée

Logement dans une rangée d'au moins trois logements réunis côte à côte sans autre logement au-dessus ou en dessous.

DEFINITIONS - Continued

Apartment in a Building That Has Five or More Storeys

Refers to a dwelling unit in a high-rise apartment building.

Apartment in a Building That Has Less Than Five Storeys

Refers to a dwelling unit in a triplex, quadruplex or a dwelling unit in a non-residential building or in a house that has been converted.

House Attached to a Non-residential Building

Refers to a single dwelling attached at ground level to another building (such as a store, etc.) but separated from it by a common wall running from ground to roof.

Mobile Home

Refers to a dwelling which has been designed and constructed to be transported on its own chassis and capable of being moved on short notice.

Other Movable Dwelling

Refers to a dwelling such as a tent, travel trailer, railroad car or houseboat.

Private Household. Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

Household Size. Refers to the number of persons in a PRIVATE HOUSEHOLD.

Census Family. Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status; they accordingly appear as a husband-wife family in the census family tables.

Census Family Composition. Refers to the classification of census families in terms of the number and/or age groups of children at home.

DÉFINITIONS - suite

Appartement dans un immeuble de cinq étages et plus

Logement dans une tour d'habitation.

Appartement dans un immeuble de moins de cinq étages

Logement dans un triplex ou un quadruplex, dans une construction non résidentielle ou dans une maison qui a été transformée.

Maison attenante à une construction non résidentielle

Logement individuel attenant au niveau du sol à une autre construction, par ex., un magasin, mais qui en est séparé par un mur commun s'élevant du sol au toit

Habitation mobile

Logement conçu et construit pour être transporté sur son propre châssis et qu'on peut déplacer sans grand délai.

Autre logement mobile

Logement tel qu'une tente, une roulotte de voyage, une voiture de chemin de fer ou un bateau-maison.

Ménage privé. La ou les personnes (autres que des résidents étrangers) qui occupent un logement privé et qui n'ont pas de lieu de résidence habituelle ailleurs au Canada. Le nombre de ménages privés est égal au nombre de logements privés occupés.

Taille de ménage. Nombre de personnes dans un MÉNAGE PRIVÉ.

Famille de recensement. Époux et épouse (avec ou sans enfants jamais mariés, peu importe leur âge) ou un parent seul (peu importe son état matrimonial) avec un ou plusieurs enfants jamais mariés (quel que soit leur âge) vivant dans le même logement. Aux fins du recensement, les personnes vivant en union libre sont considérées comme "actuellement mariées", peu importe leur état matrimonial légal; elles figurent donc comme une famille époux-épouse dans les tableaux sur la famille de recensement.

Composition de la famille de recensement. Les familles de recensement sont classées selon le nombre et (ou) le groupe d'âge des enfants à la maison.

- IX - 95-902

DEFINITIONS - Concluded

Census Family Status. Refers to the classification of the population into family and non-family persons.

Family persons refers to household members who belong to a census family.

Non-family persons refers to household members who do not belong to a census family.

Census Family Structure. Refers to the classification of census families into husband-wife families (with or without children present) and lone-parent families by sex of parent. Note however, in this bulletin, lone-parent families are not broken down by sex of parent.

CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. Users are advised that each table is noted accordingly.

SAMPLING

The 1981 Census data were collected either on a 100% basis (i.e. from all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 100% basis. All table headings are noted accordingly.

DÉFINITIONS - fin

Situation des particuliers dans la famille de recensement. Catégorisation de la population en personnes faisant partie d'une famille et en personnes hors famille.

Personnes faisant partie d'une famille - Membres d'un ménage qui font partie d'une famille de recensement.

Personnes hors famille - Membres d'un ménage qui ne font pas partie d'une famille de recensement.

Structure de la famille de recensement. Catégorisation des familles de recensement en familles époux-épouse (avec ou sans enfants présents) et en familles monoparentales selon le sexe du parent. Il est à noter, cependant, que dans ce bulletin, les familles monoparentales ne sont pas ventilées selon le sexe du parent.

CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres publiés dans le présent rapport ont subi un arrondissement aléatoire qui supprime toute possibilité d'associer des chiffres à une personne facilement reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) iusqu'à un multiple de "5". Cette technique assure une protection efficace contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Cependant, comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences. De même, la somme de pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément au total des éléments. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies. Les renvois au bas des tableaux avertissent l'utilisateur en conséquence.

ÉCHANTILLONNAGE

Les données du recensement de 1981 ont été recueillies sur une base de 100 % (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur l'ensemble de la population. Les renseignements figurant dans le présent bulletin ont été recueillis selon la première méthode. Tous les titres des tableaux ont été annotés en conséquence.

DATA QUALITY

Introduction

Any census data will be subject to error. Some of the errors will tend to cancel out over a large number of cases (i.e. for larger cells) as errors will be made in both directions (i.e. random errors). In general the proportion or rate of these random errors increases as the population or cell size decreases. Thus, small data values, even though collected on a 100% basis, should be used with some caution.

Other of the errors will tend not to cancel out as errors will have a tendency to occur in one direction more than another (systematic errors, for example, question wording which invites errors in one direction more than in the other) and will result in a bias.

The data contained in this bulletin are subject to coverage errors, response errors and to processing errors.

Coverage Error

A coverage error occurs in the census whenever a person or a household is missed completely or counted more than once. Since overcoverage is fairly rare in relation to undercoverage, the net effect of such errors is to introduce a downward bias in census figures, so that the published census estimates tend to underestimate the actual population.

A special study was undertaken in relation to the 1976 Census to measure the extent of the bias due to undercoverage. This study estimated the overall undercoverage rate to be of the order of 2% of the total population for persons and 2% for households. It also indicated that undercoverage is higher in certain segments of the population, e.g., young male adults and recent immigrants. Similar trends were obtained in connection with the 1971 Census.

A comparable study was undertaken for the 1981 Census but the results were not available at the time this report was published.

Response Error

A response error occurs when the response recorded is incorrect. Such errors may occur due to the respondent misinterpreting the question, inadvertently checking the wrong box, or even consciously checking the wrong box. Contributing to this error may be the questionnaire wording or organization, or the training and attitude of enumerators.

QUALITÉ DES DONNÉES

Introduction

Dans tout recensement, les données recueillies peuvent être entachées d'erreurs. Certaines de ces erreurs tendent à s'annuler à mesure que le nombre de cas observés augmente (c'est-à-dire dans le cas des classes plus importantes) puisque les erreurs se font dans les deux sens (erreurs aléatoires). De façon générale, la proportion ou le taux d'erreurs aléatoires augmente au fur et à mesure que la taille de la population ou de la classe diminue. Aussi, faut-il utiliser avec une certaine réserve les petits chiffres obtenus, même si ces données ont été recueillies auprès de l'ensemble de la population.

Dans d'autres cas, les erreurs ne s'annulent pas parce qu'elles ont tendance à se produire dans un sens plutôt que dans un autre. Il s'agit d'erreurs systématiques. Par exemple, le libellé d'une question peut favoriser les erreurs dans un sens particulier. Ces erreurs entraînent un hiais.

Des erreurs d'observation, des erreurs de réponse et des erreurs de traitement ont pu influer sur la qualité des données fournies dans le présent bulletin.

Erreur d'observation

Il y a erreur d'observation au recensement lorsqu'on oublie complètement une personne ou un ménage ou qu'on le compte plus d'une fois. Étant donné que le surdénombrement est assez rare par rapport au sous-dénombrement, de telles erreurs produisent un biais vers le bas dans les statistiques du recensement, de sorte que les estimations publiées du recensement tendent à sous-estimer le chiffre réel de population.

On a entrepris une étude spéciale sur le recensement de 1976 afin d'évaluer le biais entraîné par le sous-dénombrement. Selon les résultats, le taux global du sous-dénombrement serait de 2 % de l'ensemble de la population dans le cas des particuliers et de 2 % pour les ménages. L'étude a révélé que le sous-dénombrement est plus élevé dans certains groupes de la population, par exemple chez les jeunes adultes de sexe masculin et les nouveaux immigrants. On avait décelé les mêmes tendances lors du recensement de 1971.

Une étude similaire a été entreprise pour le recensement de 1981, mais les résultats n'étaient pas accessibles au moment de la parution du présent bulletin.

Erreur de réponse

Une erreur de réponse se produit lorsque la réponse enregistrée est incorrecte. De telles erreurs surviennent lorsque le répondant a mal interprété la question ou a coché la mauvaise case par inadvertance ou même volontairement. La formulation des questions ou le mode de présentation du questionnaire ainsi que la formation et l'attitude des agents recenseurs sont des facteurs qui peuvent favoriser ce genre d'erreurs.

Processing Error

Processing errors can occur when write-in answers are coded, when responses on the questionnaire are transcribed to be read by the computer, and when imputations are done either for non-response or for edit rejects.

A comprehensive assessment of the quality of the census data collected on a 100% basis will be included in <u>Data Quality</u> - <u>Total Population</u> (Catalogue No. 99-904).

SPECIAL NOTES

Users are advised that comparisons of structural type data with previous censuses should be approached with caution. More information should be available in Data Quality - Total Population (Catalogue No. 99-904).

The category SINGLE ATTACHED appearing in some of the tables refers to the aggregate count of three structural types, namely: Semi-detached (or Double house), Row house and House attached to a non-residential building. In some tables, however, counts for each of the above structural types are presented separately.

REFERENCE PRODUCTS

The 1981 Census Dictionary (Catalogue No. 99-901) contains the complete range of definitions for all variables and terms used in the 1981 Census data products. Of general interest would be information contained in Summary Guide - Total Population (Catalogue No. 99-902) and Summary Guide - Sample Population (Catalogue No. 99-903) which include lists and indexes of tables appearing in the data publications, as well as reproductions of the census questionnaire forms and basic indicators of data quality. Further details on the data quality may be obtained from Data Quality - Total Population (Catalogue No. 99-904) and Data Quality - Sample Population (Catalogue No. 99-905).

A wide range of other analytical and reference products are available and described, along with information on data products and available services, in Products and Services of the 1981 Census of Canada.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- -- amount too small to be expressed.

Erreur de traitement

Des erreurs de traitement peuvent se produire lorsque des réponses en toutes lettres sont codées, lorsque les réponses du questionnaire sont transcrites en langage d'ordinateur et lorsqu'on fait des imputations pour tenir compte soit de la non-réponse soit des rejets au contrôle.

95-902

Une évaluation détaillée de la qualité des données du recensement recueillies sur une base intégrale sera présentée dans la publication Qualité des données - Population totale (nº 99-904 au catalogue).

NOTES SPÉCIALES

Les utilisateurs sont priés de noter que des comparaisons de données sur le type de construction avec celles de recensements précédents ne doivent être faites qu'avec précaution. Ils trouveront davantage de renseignements dans la publication Qualité des données - Population totale (nº 99-904 au catalogue).

La catégorie des LOGEMENTS INDIVIDUELS ATTENANTS, utilisée dans certains tableaux, comprend les chiffres de trois types de construction: les maisons jumelées ou maisons doubles, les maisons en rangée et les maisons attenantes à une construction non résidentielle. Cependant, les chiffres de chacun de ces types de construction figurent séparément dans certains tableaux.

PRODUITS DE RÉFÉRENCE

Le Dictionnaire du recensement de 1981 (nº 99-901 au catalogue) donne les définitions de toutes les variables et de tous les termes utilisés dans les produits du recensement de 1981. Les renseignements que renferment le Guide sommaire - Population totale (nº 99-902 au catalogue) et le Guide sommaire -Population-échantillon (nº 99-903 au présentent un intérêt général puisqu'ils donnent la liste et l'index de tous les tableaux des publications ainsi qu'une reproduction des questionnaires du recensement et les indicateurs de base de la qualité des données. On peut obtenir plus de détails sur la qualité des données dans Qualité des données - Population totale (nº 99-904 au catalogue) et Qualité des données - Populationéchantillon (nº 99-905 au catalogue).

La publication Produits et services du recensement du Canada de 1981 décrit une foule d'autres analyses et de produits de référence, et fournit des renseignements sur les produits et services disponibles.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- -- nombres infimes.

.
